

Save the Date! October 2nd, 2018

Wisconsin Society of American Foresters Fox River Valley
Chapter & Great Lakes Timber Professionals Association Joint
Meeting:
“EAB Silviculture Guidelines Advisory Committee Findings
and Guidance Update”

Emerald Ash Borer (EAB) is a threat to many of the forests in our area. Much debate has been made about how to best manage the woods to help combat against this threat while keeping the woods healthy and productive. The WI EAB Silviculture Guidelines Advisory Committee, organized by the WI DNR, will have updated findings and guidance completed at the time of our meeting. With these findings and guidance, we can begin to propose and implement new management ideas and directives in order to provide the best advice to the landowners and land managers that may be impacted by EAB in the future.

Join us on October 2nd in Shiocton as we explore the EAB Committee's findings and discuss the future management of ash dominated forests.

More details about the days agenda and registration to follow.

Where: Riverrail Bar & Restaurant in
Shiocton, WI

When: October 2nd, 2018
