Diversity and Inclusion During a Time of Rapid Change

Diversity, equity and inclusion are long-standing challenges in forestry and natural resources, both in the profession and institutions of higher education. While we have made some important strides forward, our discipline remains one of the least diverse. This presentation will highlight some early university efforts to create more inclusive instruction in forestry and natural resource programs, with an eye toward the future.

Tech

Enrollment trends in natural resources degree programs in the U.S. with an emphasis on diversity

The presentation will show enrollment trends in natural resources degree programs in the U.S. dating back to 1980, emphasizing differences among disciplines and among genders and races/ethnicities. It will end with a number of strategies for increasing diversity in these programs.
